

INTERACTIVE TABLET

What Is It?

Before

We have been using meeting rooms like this for years...

After

All-in-one system makes meeting rooms ever so simple and organized.

A large tablet for meetings, integrated with all the essential and conventional functions.

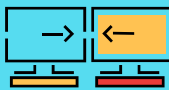

Product Features

Fluent writing Flexible marking

2 mm high precision writing, 20 points touch, and smart gestures for erasing, zooming, and dragging makes it convenient to mark MS Office documents, and facilitates fluent presentation.

Wireless projection Multi-screen interaction

The interactive tablet supports one-click projection from PC, and two-way control. It also supports multiplex control and operation on smart phones and pads through wireless projection, enabling greater view and friendly experience.

Remote upgrade and maintenance

Remote online upgrades are supported for real-time access to latest features and applications.

Application

The interactive tablet breaks the pattern of individual-product system and integrates functions such as high-definition display, touch screen writing and wireless projection. It can be widely used in conferences by various organizations such as **teaching classrooms, government agencies, financial entities, technology businesses, and real estate companies.** It is born to make meetings productive!

Product Solutions
