## Products Overview

	DS-K5604A-3XF/V	DS-K1T671TM-3XF	DS-K5671-3XF/ZU
			
LCD screen	10.1 inch	7 inch	7 inch
Face capacity	50,000	50,000	50,000
Card capacity	N/A	50,000 M1 cards	N/A
Thermal imaging resolution	120 x 160	120 x 160	120 x 160
Temperature range and accuracy	30-45°C (±0.5 °C)	30-45°C (±0.5 °C)	30-45°C (±0.5 °C)
Authentication Distance	0.3-2m	0.3-2m	0.3-2m
Mask detection	Support	Support	Support
Fast temperature measurement	Support	Support	Support
Deployment	Plug & play, floor standing Including power adaptor	Wall mounting/ floor standing with mounting pole	Face recognition module for barriers

# Products Introduction - Highlights

HIKVISION

## Fever screening face recognition terminal

### Plug & play

#### Rapid deployment.

Free of wiring, installation and configuration.

### Various verification methods

Supporting fast temperature measurement and face recognition with fever screening.

Plug  
&  
play

### Enhanced verification performance

Face recognition verification duration  
less than 0.2s.

Supporting face anti-spoofing.

### Long term fever screen

Authentication distance: 0.3-2 m.

### Mask detection

Supporting face mask wearing alert and  
forced mask wearing alert.

### Dedicated for fever screening

Temperature range: 30°C to 45°C.  
Temperature accuracy: ±0.5°C.

DS-K5604A-3XF/V

# Products Introduction - Highlights

## Fever screening face recognition terminal

### Flexible deployment

Supporting wall mounting and floor standing with mounting pole.

### Various verification methods

Supporting fast temperature measurement and face/card recognition with fever screening.

### Enhanced verification performance

Face recognition verification duration less than 0.2s.  
Supporting face anti-spoofing.

### Mask detection

Supporting face mask wearing alert and forced mask wearing alert.

### Long term fever screen

Authentication distance: 0.3-2 m.

### Dedicated for fever screening

Temperature range: 30°C to 45°C.  
Temperature accuracy: ±0.5°C.

# Products Introduction - Highlights

HIKVISION

## Fever screening face recognition module for barriers

### Easy to deployment

Fever screening face recognition module for barriers.

### Various verification methods

Supporting fast temperature measurement and face recognition with fever screening.

### Long term fever screen

Authentication distance: 0.3-2 m.

### Dedicated for fever screening

Temperature range: 30°C to 45°C,  
Temperature accuracy: ±0.5°C.

### Mask detection

Supporting face mask wearing alert and forced mask wearing alert.

### Enhanced verification performance

Face recognition verification duration less than 0.2s.  
Supporting face anti-spoofing.

HG-K5671-3XE/7

# Products Introduction – Thermal Technology

## Comparison between thermal imaging and thermopile technology

### Thermopile technology

3-rd party thermopile solution

**Summary:**

Measuring the maximum temperature value in a fixed small area. After face authentication, the maximum temperature value of the fixed area is obtained for display.

Since the thermopile itself cannot detect faces, it cannot ensure that face temperature is measured, or whether it is the authenticated person.

### ★ Thermal imaging technology

Hikvision thermal imaging

**Summary:**

Generating hot try by measuring the temperature of all the objects in the measuring scale, detecting faces by AI algorithm, and extracting the temperature of forehead.

The thermal module matches the forehead temperature and face to ensure the authenticity and validity of temperature measurement.

# Products Introduction – Thermal Technology

## Comparison between thermal imaging and thermopile technology

Type	Thermopile	Thermal imaging	Comments
Resolution	32X32	120X160	—
Measurement distance	0.3m~0.5m	0.3m~2m(depends on focus of device)	—
Measurement scale	Small, fixed area of the screen	Large scale, any area within the screen	
Adaptability	Asking for high adaptability of personnel	No need deliberate cooperating, except for entering the screen	
Efficiency	5 s/person	1 s/person	
Measurement and face matching	Temperature measurement can not be matched accurately, authenticity and validity of temperature measurement are limited.	Face detection and face forehead temperature accurately match, "one face, one temperature", temperature measurement data is true and effective.	<p><b>Thermopile:</b></p> <ul style="list-style-type: none"> <li>Limited measurement scale,</li> <li>Low accuracy and efficiency of fever screen.</li> </ul> <p><b>Thermal imaging:</b> ★</p> <ul style="list-style-type: none"> <li>Bigger measurement scale,</li> <li>AI algorithm for face detection,</li> <li>High accuracy and efficiency of fever screen.</li> </ul>
Measurement error	Temperature measurement area is limited, the measurement subject can not be guaranteed, the temperature will be any part of the person or other objects within the screen.	Face detection tracking, guaranteed that the measurement is the temperature of the person's forehead, and the true body temperature is similar.	
Labor cost	The temperature measurement process requires the management personnel to participate in the whole guide, the labor cost is high.	Temperature measurement process requires little involvement of managers, and labor cost is low.

LCD screen

Detector light

# Solution Introduction

**HIKVISION**

## Solution advantages

### Touch-free, fast fever screening

- Hygiene – touchless fever screen
- Convenient – information displayed on LCD
- Long distance verification & measurement

### High adaptability

- Suitable for various indoor scenarios
- Easy installation & configuration

### High security

- Fever screening - avoiding people with abnormal temperature entering
- Metal detecting – indicating location of metal

### Centralized management

- Combining temperature data and people counting statistics for easy management and query

# Solution Introduction

**HIKVISION**

## Solution ordering notes

### Fever screening metal detector door

- Model name: ISD-SMG318LT-F
- Metal detector door and thermal camera all-in-one

### Thermal camera

- Model name: DS-2TD1217B-3/PA(B)

*\*(SAP code can be checked in 'Product Introduction – Brief Datasheet Part or price list)*

# Products Introduction

# Products Introduction - Highlights

## Fever screening metal detector door

### Statistics

People counting, metal alarms counting, people with abnormal temperature, etc.

### Metal detector

Detecting metals small to clips.

### Multi-zone alarm

18 independent detection zones.

ISD-SMG318LT-F

**High reliability & good quality**  
Modular design of door body.

**Dedicated for fever screening**  
Temperature range: 30°C to 45°C.

**High accuracy**  
Temperature accuracy: ±0.5°C.

**LCD display**  
Real-time display of statistics and body temperature.

# Products Introduction - Highlights

HIKVISION

## Body temperature measurement camera

### High sensitivity sensor

160 × 120 resolution in thermal channel.

### Enhanced image quality

Provide 3D Digital Noise Reduction to guarantee enhanced details of image.

### Comprehensive alarm function

Strobe light and audio alarm supported.

DS-2TD1217B-3/PA(B)

### Dedicated for fever screening

Temperature range: 30°C to 45°C.

### High accuracy

Temperature accuracy: ±0.5°C.

# Products Introduction – Bidding Feature

Items	ISD-SMG318LT-F
Thermal imaging max. resolution	160 x 120
Thermal imaging Lens(Focal Length)	3mm
Visible Light Sensor	4MP 1/2.7" Progressive Scan CMOS
Visible Light Focal Length	4mm
Visible Light WDR	120dB
Measurement range	30°C to 45°C
Measurement accuracy	No black body: $\pm 0.5^{\circ}\text{C}$ With black body: $\pm 0.3^{\circ}\text{C}$
Measurement distance	0.3 m to 3 m
Multi-area alarm	Indicates the metal position on the body. Max. 18 areas
LCD screen	7-inch touch screen
Protective level	Dome camera: IP66 Walk-through detector: IP53

*Note: Indoor installation is recommended for accuracy of temperature measurement(without wind).*
