Huckel Zheng, General Manager of Hikvision Malaysia and Charles Yang, General Manager of Apaq Technology
海康威视马来西亚总经理郑啸坤与吉隆科技总经理杨志军

Sharing 分享

General Manager Huckel Zheng also shared his views on the Malaysian surveillance market. Malaysia security market kept steady growth this year for about 10% annually. **HIKVISION** still keeps its high growth rate of around 30% in global world and for the coming year.

As predicted, the new government will invest more in civil facilities and national infrastructure construction.

郑啸坤总经理分享对马来西亚监控市场的看法与展望。他说马来西亚监控市场今年仍保持稳定增长，年均增长约10%，海康威视在全球保持着约30%的高增长。

接下来一年，正如预期，马来西亚政府将加大对民用设施和国家

The digital transformation of the government or public sectors will also facilitate the market development. It is supposed to have the significant increase in consumer market for the concept of "DIY camera" and "smart home" which becomes more and more popular, so we think the consumer market will be also another main factor for driving the market growth.

基础建设的投资。政府或公共部门的数字化转型也将促进市场发展。随着"DIY"相机和"智能家居"的概念越来越流行，消费市场应该有较大的增长，所以我们认为消费市场也是推动市场增长的另一个主要因素。随着整体市场的增长，我认为在接下来的一年里，

Along with the overall market growth, I think all verticals will keep growing in the following year. Transportation vertical inclusive of airport, railway, port, etc and city surveillance vertical perhaps will grow much higher in the coming year, because of more investment from government, especially in public security, like "city surveillance", the important part of smart city construction.

所有行业都会增，包括机场、铁路、港口等在内的交通行业，城市监控行业或许在未来的一年里会增长的更高，因为政府投入更多，尤其在公共安全方面，比如"城市监控"，这是智慧城市建设的重要组成部分。

On the other hand, the public security will significantly help improving citizen satisfaction. Seeing from the market trend, we perceive that AI technology is more and more in demand, for CCTV, access control and other security solutions. The fusion of AI and conventional technology will bring really huge revolution to security industry. From now on, camera will no longer be a only "camera" for doing monitoring function, combined with various AI technology like "facial recognition", "people counting", "queueing detection" etc, will significantly help our customers to improve the efficiency of their business operation, not only for security purpose.

另一方面，公共安全将会大大提高公民满意度。根据市场的趋势，公民对于CCTV、门禁等安全解决方案和人工智能技术的需求越来越大。人工智能与传统技术的融合将给安防行业带来真正的巨大变革。从现在开始，相机将不再只做“相机”监控功能，而是结合各种人工智能技术，比如“人脸识别”、“人数统计”、“排队检测”等，将极大地帮助我们的客户提高经营效率，不仅出于安全的目的。

Outdoor Full Color Series 室外全色系列

The ideal advertising billboard, with vivid and clear visual effects, is ideal for slideshows and video ads. The new mask design allows the LED to emit almost zero reflection to ensure the display of the screen. The module design of the unit adopts high-temperature spraying technology, which greatly improves the anti-rust function.

理想的广告牌，生动而清晰的视觉效果，非常适合幻灯片和视频广告。新的掩模设计使LED发出几乎为零的反射，以确保屏幕的显示效果。机组的模块设计采用高温喷涂技术，大大提高了防锈功能。

Indoor Full Color Series 室内全色系列

Ideal for indoor advertising or display. High-resolution images and vibrant colors make it suitable for the background screen of the function hall, the indoor stadium stage, the office meeting and the reception area. Light weight cabinets for easy installation and wide viewing angles.

非常适合室内广告或展示。高像素图像和鲜明的色彩使其适合于功能大厅的背景屏幕、室内体育场舞台、办公室会议以及前台接待区。使用轻质橱柜，安装简单，视角宽。
